Introduction

This report represents the third comprehensive profile of the more than eight thousand students who entered UBC as college transfer students over a multi-year period (in this study, between 1994/95 and 1999/00).

Although this report covers a six-year period, we have divided the data where necessary into two tables covering five years each; this grouping allows for ready comparison to the five-year reports previously undertaken. Our analysis of tables concerns itself with the most recent five-year period, 1995/96 to 1999/00, unless we are discussing six years' worth of data.

These reports were begun two years ago at the behest of the British Columbia Council on Admissions and Transfer and were modeled on a similar study first completed by Simon Fraser University in October 1996. Hence report designs and definitions were, when possible, intended for comparison with the SFU study.

The data for this study pertains to 8,086 students who were admitted to faculties at UBC on the basis of admission "College Transfer." Some students with college transfer credit are admitted on the basis of their high school performance instead; this study does not identify such students as "College Transfer," but as "High School Admissions."

If a College Transfer student has attended more than one college, we deem the college of transfer to be that institution from which most credits were transferred.

The twenty one colleges, university colleges, and technical institutes represented in this report are organized by geographical regions within British Columbia. Colleges with fewer than 5 students transferring to UBC (Northern Lights College, Nicola Valley Institute of Technology) have been included in "Other or Unknown."

Note also that the total number of college transfer students (and, for comparison, high school admissions) varies among tables. This is due mainly to variations in the size of the examined cohort (e.g., a smaller number graduate than are admitted).

Executive Summary

Table 1: The overwhelming majority of college transfers to UBC come from the Lower Mainland (79% in the most recent year); this proportion has significantly increased between 1995/96 and 1996/97 and has remained fairly constant in the years to 1999/00. Increases in enrolment at the recently founded UNBC perhaps contribute to the decline in numbers of students from outside the Lower Mainland seeking to further their studies at UBC.

Transfers to UBC are most frequently from Langara, Capilano, Kwantlen, and Douglas colleges, who contributed 70% of all college transfer students in 1999/00.

Table 2: Transfer students arrive with varying amounts of credit, but only 29% of students came with 55 credits or more (in the most recent 5 years of our study). 60 credits would amount to two years of full-time study.

Table 3: Transfer students are less likely than high school admissions to undertake a full load of courses.

Table 4: Most transfer students enrol in the Faculties of Arts or Science (65% of students); this compares with 78% of High School Admissions.

Table 5: Transfer students pursuing Rehabilitation Medicine (Occupational/Physical Therapy) or Pharmacy have the highest average admission grades.

Table 6: The most popular programs for transfer students are Human Kinetics and Biology, although choices are diverse. The 10 most popular programs only account for 23% of transfer students (although some students are as yet undeclared).

Table 7: 89% of students transferring to UBC are aged 20 or older; only 5% of high school admissions are as old.

Table 8: On average more females than males transfer to UBC (mirroring high school proportions); slightly more men than women originate from colleges outside the Lower Mainland.

Table 9: 75% of college transfers enter UBC with an admission percentage grade of 75% or less.

Table 10: Students usually receive grades at the end of their first year which are below their admission average, but over time they tend to make up the loss.

Table 11: There is no significant difference in the academic performance of students from within or without the Lower Mainland; high school students, however, outperform transfer students in all the selected courses save for economics. Transfer students received grades that on average were anywhere from 3 to 8 percentage points lower than those earned by high school admissions.

Table 12: 79% of students who transferred in 94/95 or 95/96 completed their degree during the time frame of this study.

Table 13: On average, graduating students admitted from high school achieve better grades in their final session than do graduating students who transferred from college (76% vs. 74%).

Table 14: Students tend to receive first year grades which are lower than their admission average, but by the time they graduate they have usually made up the loss.

Table 15: Graduating students most frequently had enrolled in Human Kinetics or Biology, the most popular programs of study (see Table 6).

Table 16: The most popular degree programs were the B.A. and B.Sc., which account for 58% of transfer students who graduated. Transfer students took an average 2.8 winter sessions to complete their degree; this average would perforce increase if we extended the timeframe of our study.

I. Profile of BC College Transfer Students

Table 1: Year of Admission

UBC admits each year between 1,112 and 1,527 students who transfer from B.C. colleges. High School entries account for more than twice as many admissions.

The majority of college transfer students come to UBC from lower mainland colleges (78.9% in 1999/00), with only 3.1% of this figure coming from private institutions. Non lower mainland colleges comprise some 17.7% of UBC's college transfer admissions. The remaining 3.3% come from the Open University or other/unknown colleges.

Langara College (formerly a campus of Vancouver Community College) supplies UBC with more college transfer students than any other institution. In 1999/00 414 Langara students entered UBC, representing 34% of the lower mainland group. This number has remained relatively stable.

Overall, 54.9% of all college transfers to UBC are from three lower mainland colleges: Langara, Capilano, and Kwantlen. From outside the lower mainland, the largest number of transfers come from Okanagan University College, with 450 students over six years (28.0% of the non lower mainland number, and 5.6% of the total). The Northern B.C. colleges provided, on average, only 2.4% of the total transfer students over the six-year span.

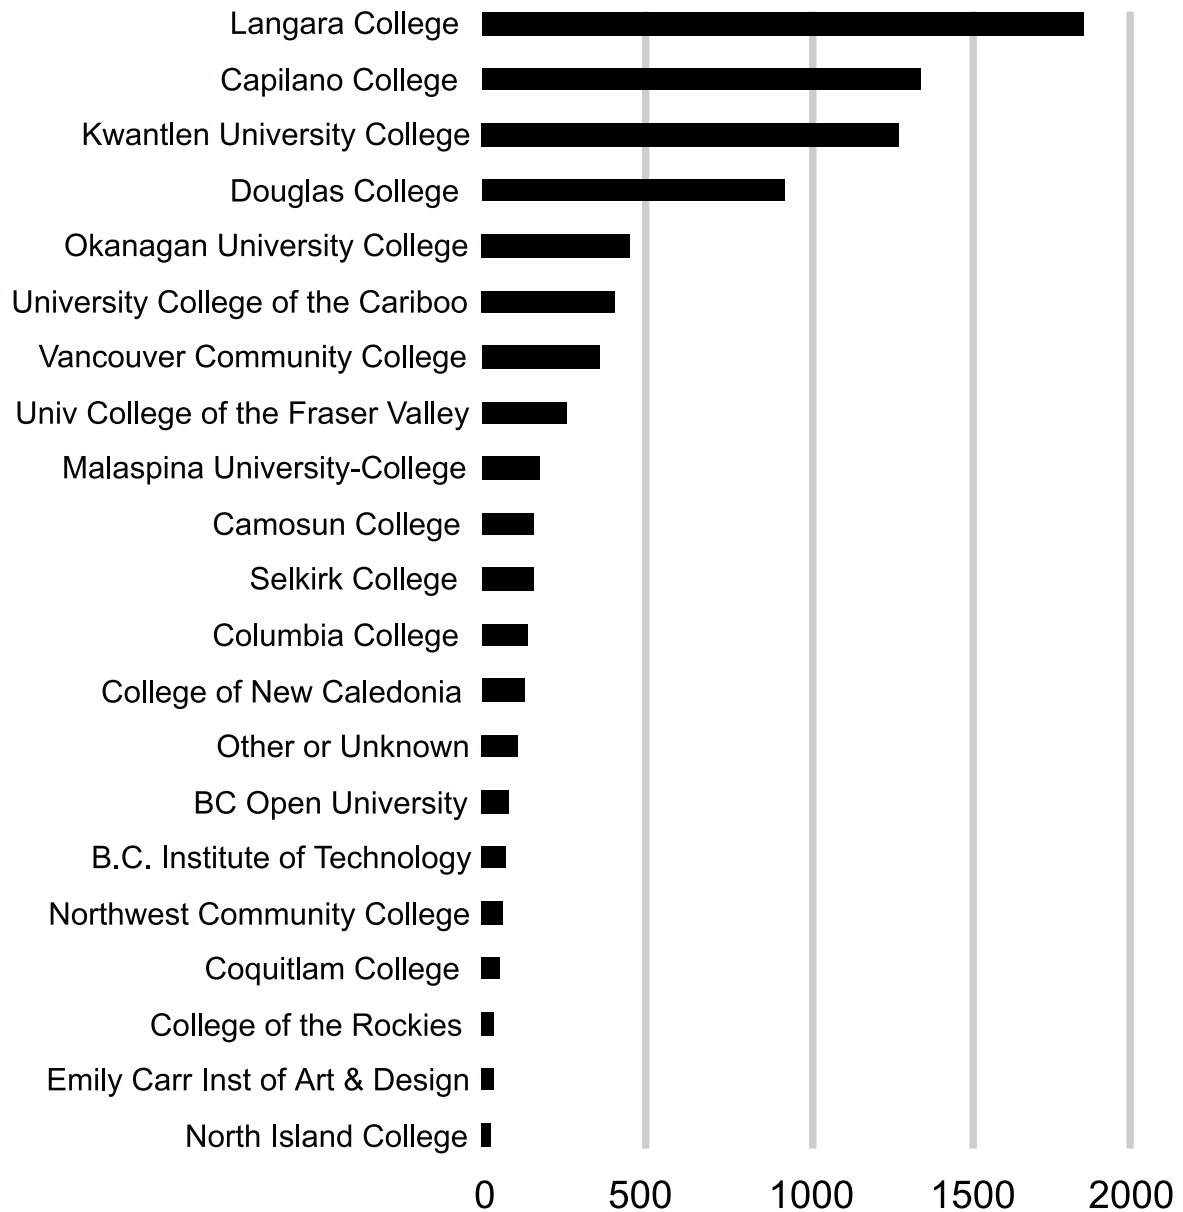

Figure 2: BC College Transfers Admitted to UBC by Region

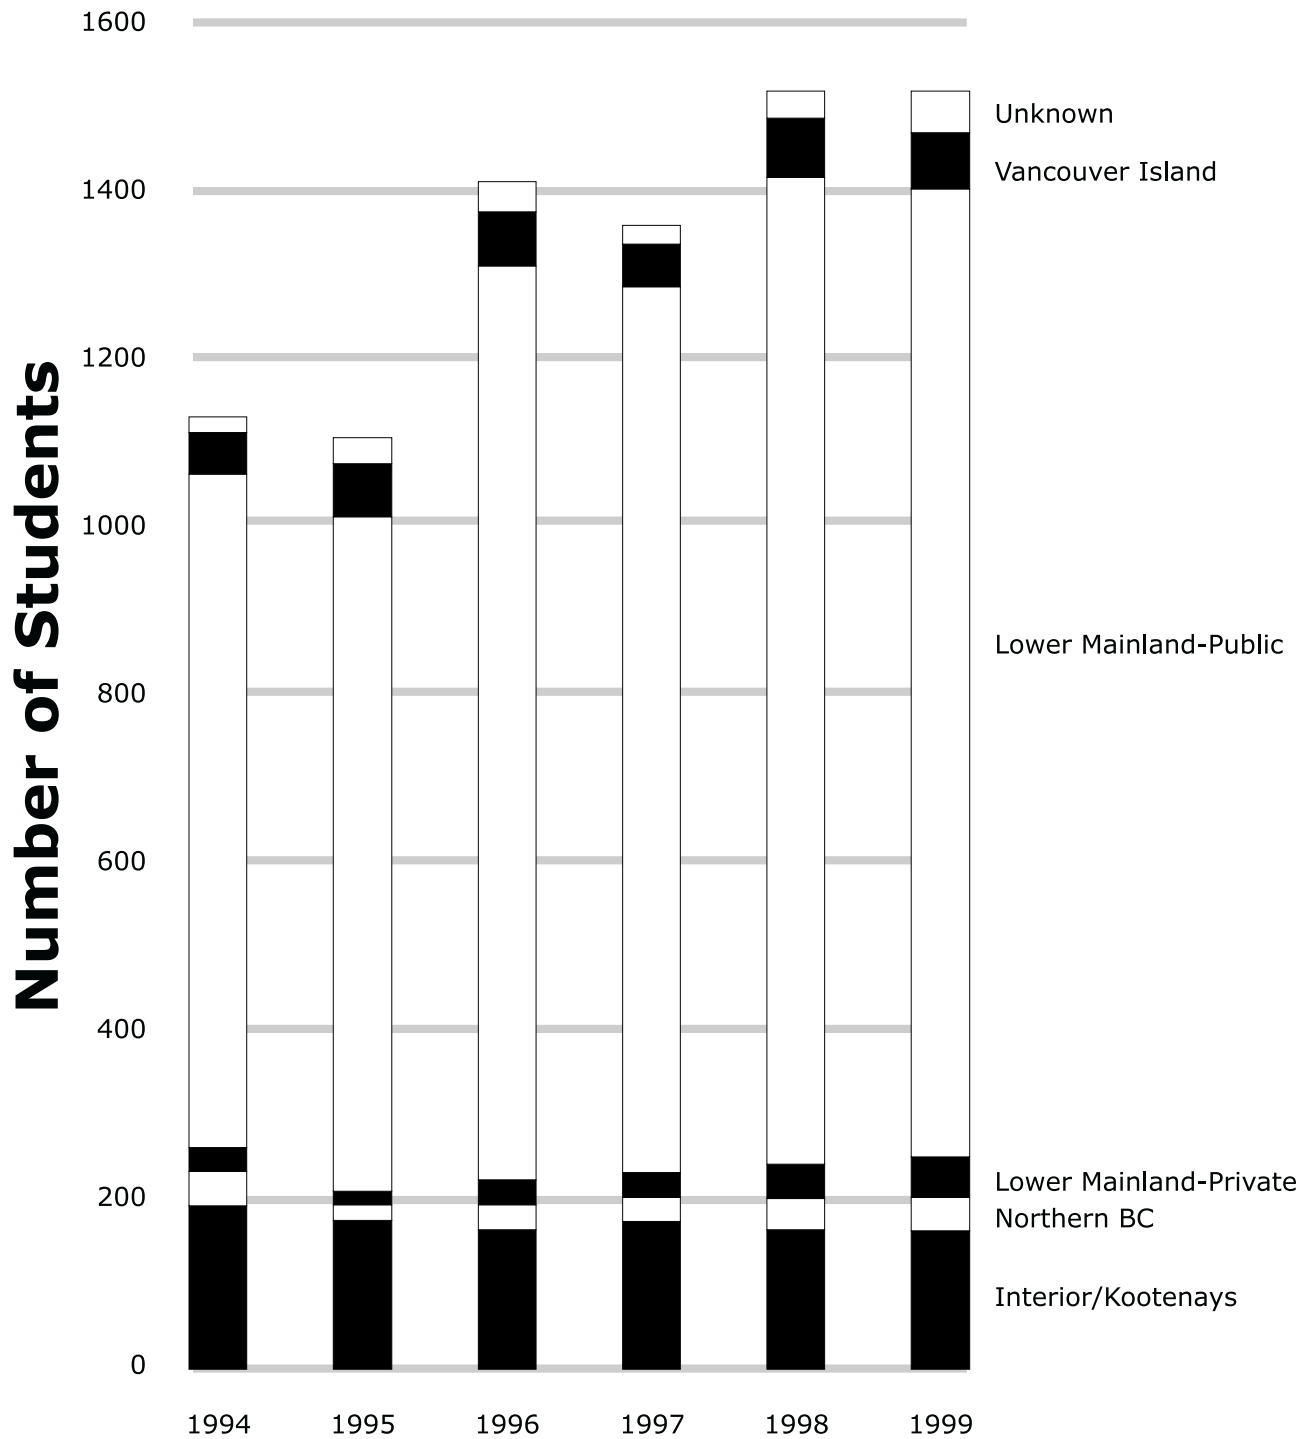

Figure 3: BC College Transfers Admitted to UBC by Year
 (Lower Mainland Colleges only)

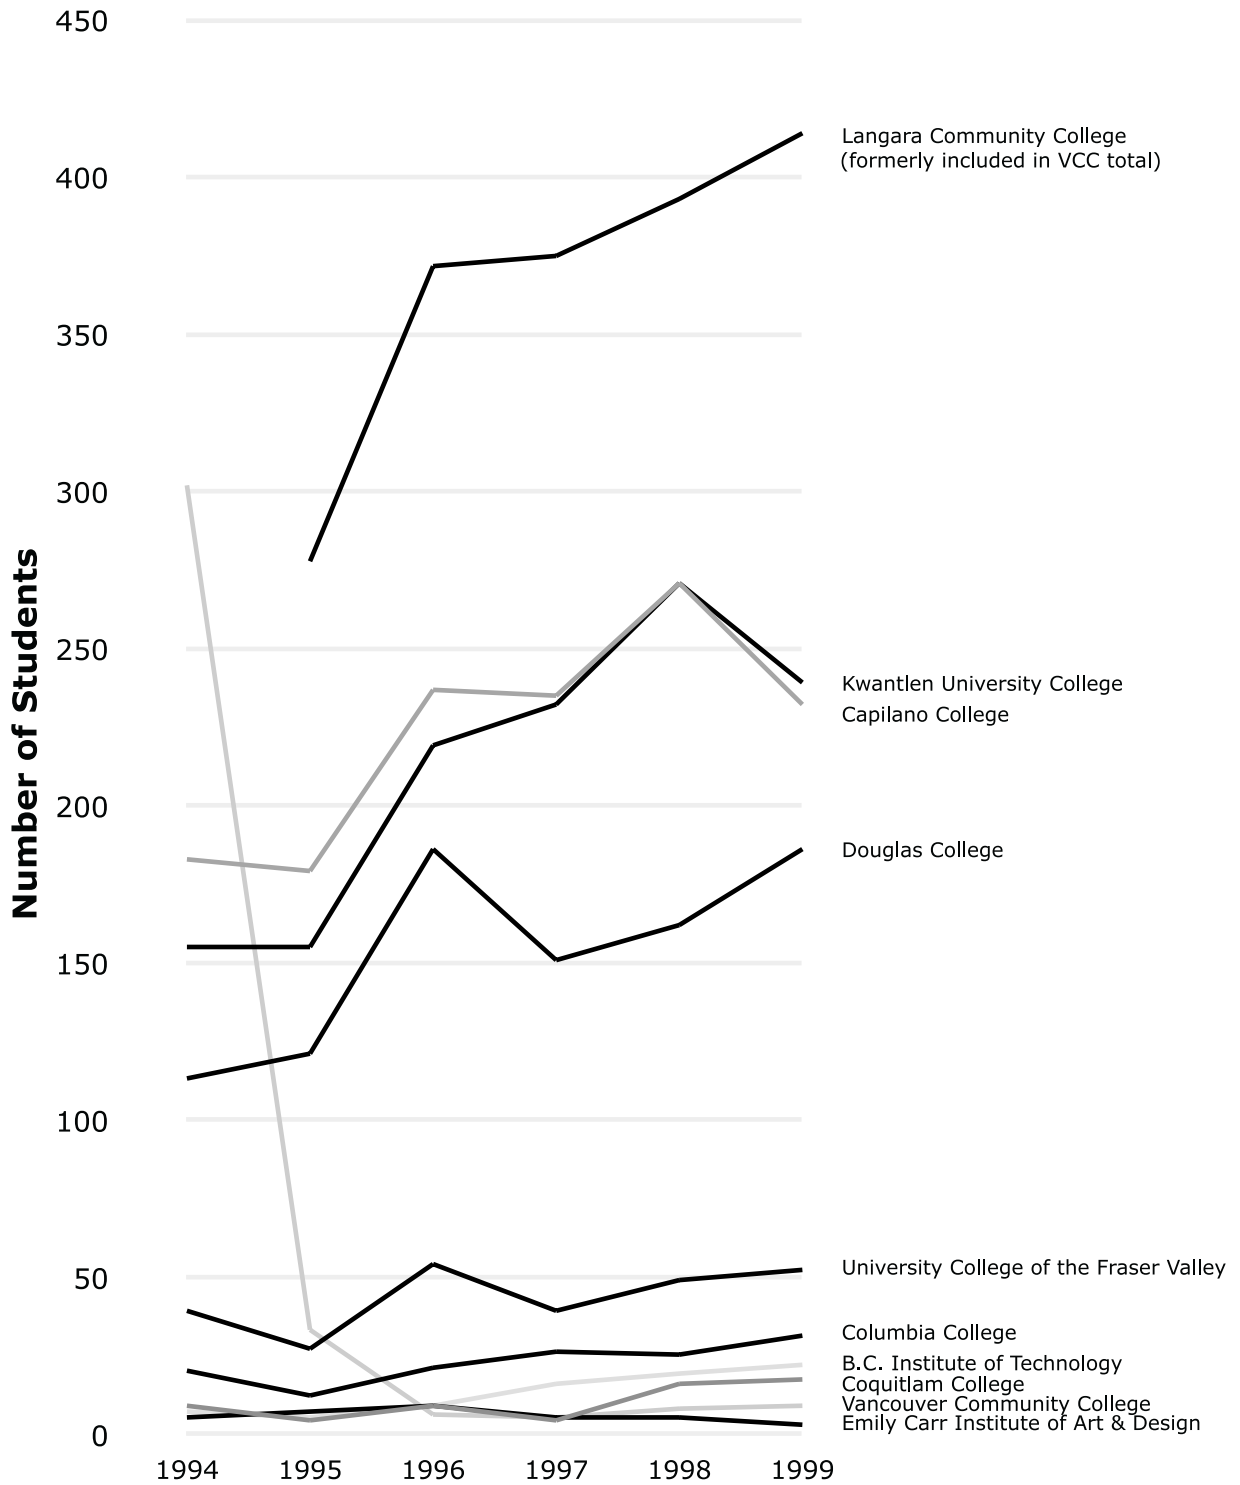

Table 2: Transfer Credits at Admission

Most college transfers enter UBC with between 1 and 2 years of credit.

Those from technical or art & design institutes, such as BCIT or Emily Carr, transferred with the least number of credits (most of their students transferred with less than 30 credits).

(The table for 1995/96-1999/00 is followed by one for 1994/95-1998/99; the analysis above pertains to the most recent table. In 1994/95 UBC did not include transfer credits that did not go toward the student's degree program.)

Table 3a: Workload in 1st Year at UBC

Transfers from Northern BC colleges had on average large workloads (29% taking 31 or more credits, and 74% taking 25 or more). Lower Mainland transfers took the lightest loads, with only 13% enrolled in 31 or more credits and 49% taking 25 or more.

The differences between transfers and high school admissions is marked: high school admissions are much more likely to maintain a heavy workload, with 84% of students taking 25 or more credits. This compares with 52% of college transfers.

(The table for 1995/96-1999/00 is followed by one for 1994/95-1998/99; the analysis above pertains to the most recent table.)

Table 3b: Full-Time/Part-Time Status

UBC considers students taking 24 or more credits to be full-time.

As in table 3a (workload), high school admissions enrol in more courses (93.3% are full-time) than college transfer students (69.4%).

Institutions from outside the lower mainland show a slightly higher percentage (78.6%) of full-time students than do those from the lower mainland (67.4%), with College of New Caledonia students being the highest at 86.5%.

While Emily Carr students appear to have a light course load, these figures should be interpreted with caution: this institution sends very small numbers to UBC, and is not typical of the average transfer college.

(The table for 1995/96-1999/00 is followed by one for 1994/95-1998/99; the analysis above pertains to the most recent table.)

Note: this table cannot be derived from Table 3a since full-time is defined as 24 or more credits.

Table 4: Faculty of Intended Major

The majority of new students tend to enter one of two faculties: Arts or Science. The third most popular faculty is Human Kinetics (for transfer students) or Applied Science (for high school admissions). Arts and Science comprise 65.1% of the total college intake. Note that high school students are not usually admitted to certain faculties until they have completed coursework or degrees (e.g. Commerce, Law). See Glossary (page 61) for full faculty and school name.

(The table for 1995/96-1999/00 is followed by one for 1994/95-1998/99; the analysis above pertains to the most recent table.)

**Table 5: Admission GPA of College Transfer Students
by Faculty of Intended Major 1994/95-1999/00**

The following shows the admission GPA for each faculty (or school) in which transfer students enrolled. Students with an unknown admission GPA were omitted from the calculation, as were (because of systems problems) students entering in '95 or '97.

Students enrolled in the faculty of Pharmaceutical Science & the school of Rehabilitation Medicine had the highest average entering grades; students enrolled in Agricultural Sciences and Forestry had the lowest.

College Transfer	
Agricultural Sciences	67.7
Applied Sciences	74.5
Arts	70.9
Commerce & Business Administration	74.2
Education	71.2
Family & Nutritional Sciences	72.4
Forestry	68.4
Human Kinetics	71.8
Medical Laboratory Science	71.6
Music	71.9
Nursing	72.7
Pharmaceutical Science	77.2
Rehabilitation Medicine	80.5
Science	71.4
Social Work	73.8

Table 6: Approved Program of Study

Students at UBC may choose from over 100 programs; the programs listed are where college transfer enrolments are highest. "Other Programs" includes transfer students who have not yet selected a specialization. College transfer students from the Lower Mainland most frequently enrol in Human Kinetics (5.7% of transfers) or Biology (3.5%); those outside the Lower Mainland most commonly take Biology (8.6% of transfers) or Forest Management (5.1%).

See Glossary (page 61) for full program name.

(The table for 1995/96-1999/00 is followed by one for 1994/95-1998/99; the analysis above pertains to the most recent table.)

Table 7: Age at Admission

It should come as no surprise that college transfer students tend to be older than high school admissions. While 95.5% of high school admissions are under the age of 20 at the time of entry, the largest cohort for college transfer students is aged 20-24 (68.0%).

(The table for 1995/96-1999/00 is followed by one for 1994/95-1998/99; the analysis above pertains to the most recent table.)

Table 8: Gender

Overall, the percentage of female college transfers (54.8%) is similar to that for high school admissions (55.6%).

More males (55.9%) than females (44.1%) transfer to UBC from Northern BC, whereas the proportion of male/female students from the Interior/Kootenays is about equal. In the lower mainland, however, more females (56.2%) than males (43.8%) transfer, with BCIT (69.0% male) and Emily Carr (79.3% female) showing the greatest extremes. Vancouver Island transfer students are more likely to be female (52.1%) than male (47.9%).

(The table for 1995/96-1999/00 is followed by one for 1994/95-1998/99; the analysis above pertains to the most recent table.)

II. Academic Performance of BC College Transfer Students

Table 9: Admission Percentages 1994/95-1999/00

The admission percentages shown are derived by conversion from the 4 point scale (used by most colleges) to the equivalent percentage stored on UBC records. The minimum average required for admission to UBC, 2.00, is converted to a value of 60%. Note that minimum requirements vary by faculty, program, and year level (see Appendix-Admission Requirements).

The percentages are those associated with the most recent institution attended, hence for students who attended more than one previous institution, the percentage shown may not have been the only criterion for admission. Only 20 students (0.36%) show percentages below the minimum required.

The median of 72.6% would correspond to slightly under a 3.0 grade point average. Seventy-five percent of all college transfers are admitted with a percentage of 75 or less, (equivalent to a grade point average of 3.20).

<u>Admission Percent</u>	<u>BC College Transfer Students</u>	<u>Cumulative Total</u>	<u>Cumulative Percent</u>

Median	72.60		
Average	72.10		

Note: omits students with missing admission percentage
 Due to systems problems students admitted in '95 and '97 have also been omitted from this table.

Table 10: Performance by Session

The academic performance (i.e. percentage grade earned) of BC college transfers is shown at four distinct points in the students' academic progression.

Transfer students, on average, experience a decrease in measured academic performance in their first and second years at UBC relative to their entry grades. By the end of their last session, this drop has been completely recovered and exceeds average performance at admission.

By the end of the first session, grades have dropped further for non lower mainland students (-5.6 percentage points) than for lower mainland students (only -2.5 percentage points.) Students tend to recover grades in their second session, and by their last session, average grades have neared or exceeded admission GPA levels.

Exceptions to this progression include students from College of the Rockies (a 5.7 percentage point drop from admission % to last session average), North Island College (-4.2), and Coquitlam College (-3.4). The biggest gains over admission average were made by students from the Open University (3.7) and Emily Carr (3.3).

(The table for 1995/96-1999/00 is followed by one for 1994/95-1998/99; the analysis above pertains to the most recent table.)

Missing grades (for some exchange and guided independent study students) have not been included in the calculations.

Table 11: Grades in Selected Courses

We selected those courses from a variety of programs in which college transfer students were highly enrolled.

Little can be said by comparing the high school admission average to the college transfer average since these are not on comparable scales. Once both groups of students are at university, however, their subsequent performance can be compared: high school students outperform transfer students in all the selected courses save for economics. Transfer students received grades that on average were anywhere from 3 to 8 percentage points lower than those earned by high school admissions.

There is no significant difference in average performance (in these courses) between students from either main geographical division.

To protect privacy, when fewer than 5 students from a college have taken a course, their average admission and course grades are not shown (replaced with 'X').

Note: Due to systems problems the admission GPA for students in 1995 and 1997 have been omitted from this table.

Table 12: Degree Completion Rates

The more transfer credits students have upon admission, the closer they are to completion—and therefore that much more likely to complete during the course of this study.

In this table we look at only those students who transferred into UBC in 1994/95 or 1995/96, i.e. those that have had 5 or 6 years to complete their degree. Students with fewer than 30 credits are less likely to graduate within the five to six years (only 57.1% have done so). With more credits, degree completion rates improve: 87.9% of students who transferred with 55 or more credits have graduated.

Table 12: Degree Completion Rates 1994/95-1999/00

III.

Profile of BC College Transfer Students Who Have Graduated

Table 13: Average for Last Session Attended 1994/95-1999/00

(students who have graduated)

UBC does not compute a cumulative GPA for its completing students; we do, however, have an average for the last session attended. Looking at the last session average has some drawbacks (e.g., it fails to permit ready comparisons to other universities' data) but it has one significant advantage, in that it is untainted by the substantially lower early grades received by transfer students in their first and second years at UBC (as shown in Table 10: Performance by Session).

The average grades for college transfer students and high school admissions upon degree completion are 76.0% and 78.1% respectively; 44.0% of high school admissions have a session average of 80% or more, compared with 32.6% of college transfers.

The last session averages show that for students who persist in their studies and obtain a degree, the college transfer route is neither markedly better nor worse in terms of academic achievement than direct entry from high school. Both routes to a baccalaureate degree are equally viable.

Over the course of this study, 44.1% of college transfer students to UBC have graduated; only 26.7% of high school admissions did so (high school admissions typically arrive with no transfer credits, unlike the transfer students who come with a year or two of study behind them).

Figure 4: Average for Last Session Attended
(students who have graduated)

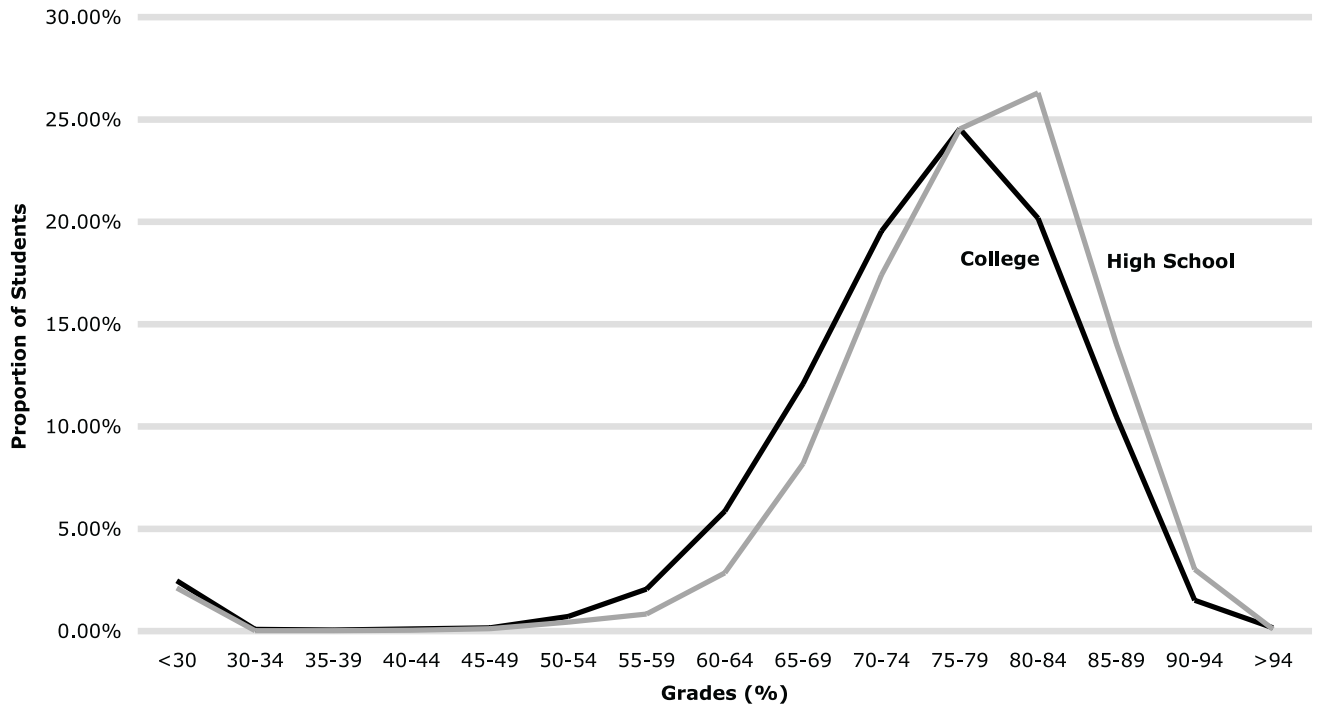

Table 14: Performance by Session 1994/95-1999/00

(students who have graduated)

Transfer students on average received somewhat lower grades at the end of their 1st session than they had been admitted with. This decrease was higher for non lower mainland students (-1.9 percentage points) than for lower mainland students (-0.3).

Average grades increase for all students between first and final session: lower mainland students experience a 3.0 point rise, while non lower mainland student improved their grades by an average 5.1 percentage points.

The most improvement was made by Open University students, gaining 11.7 percentage points by the end of first session, increasing to a total 19.2 point gain by last session—thus graduating with average grades higher than those of lower mainland transfers (whose average admission GPA was almost 14 points higher).

Total B.C. College Transfers	3654	71.2	70.7	72.1	74.2

Note: Due to system problems the admission GPA for students admitted in 1995 and 1997 has been omitted from this table.
Missing grades (for some exchange and guided independent study students) have not been included in the calculations.

Table 15: Program of Study

(students who have graduated)

Overall, more graduates specialize in Human Kinetics, Biology, Psychology, and Computer Science than any other program. Transfer students from different regions do show somewhat different preferences:

Most popular program: Overall

Human Kinetics (9.1%)
Biology (5.3%)
Psychology (3.1%)
Computer Science (2.2%)

Most popular program: Lower mainland

Human Kinetics (10.3%)
Biology (3.4%)
Psychology (3.3%)
Computer Science (2.5%)

Most popular program: Non lower mainland

Biology (12.2%)
Human Kinetics (5.7%)
Forest Management (5.6%)
Microbiology (3.4%)

**Table 16: Credential Awarded
and Average Winter Sessions to Completion**

(students who have graduated)

42% of graduating college transfer students attained a B.A. degree, 16% a B.Sc., 9% a B.Com, and another 9% a B.HK. Graduates of all other degree programs combined account for the remaining 24% of students.

The Winter Session at UBC comprises the academic year from September through to the following April. The measure "average number of winter sessions" is roughly equivalent to the number of years taken to complete the degree (although some students do attend in summer). On average, transfer students took 2.8 Winter sessions to complete the degree. As a consequence of the brief time frame of this study, only full-time transfer students have (thus far) completed their degrees, and we know college transfer students are more likely to be part-time.

The average time to completion, as well as the total degrees completed, would naturally increase should we follow these cohorts for several more years.

	Yr 2	2.4	2.6	2.5
	Yr 3 or 4	2.0	2.0	2.5

* University/College transfer students refers to students who transfer from a university or a college.

V.

Glossary

B.C. High School admission: a student admitted to a UBC faculty on the basis of high school completion. Such a student may also have credit from a college towards a degree, but the grades on which the admission is granted are from the high school records.

College Transfer Student: a student admitted to a UBC faculty on the basis of a minimum of 24 credits obtained at one or more colleges in transferable courses. Students must have a minimum grade point average of 2.00, but individual faculties may, as a consequence of enrolment quotas, set a higher admission standard.

College of Transfer: the college of transfer, if the student has attended more than one college, is that institution from which most credits were transferred.

Degree completion: a student is defined as having completed a degree in either May or November of the year if the student has applied to graduate and has successfully completed the degree requirements. The date at which a student is recorded as having completed the degree may not be the date at which the student has completed all course requirements. Many students continue to enroll in courses without obtaining a degree for some time.

Degrees and programs of study: A degree program consists of a degree, as well as a program within that degree. For example, students may choose the Bachelor of Arts degree, and the Economics program within that faculty.

Full-time and part-time: a full-time student is defined as a student enrolling in 24 or more credits in the Winter Session. A student enrolling in less than 24 credits is defined as part-time. The typical UBC program (e.g. B.A. Arts) would require a student to register in 30 credits for each of four Winter sessions, although some programs require more than 30 credits per session.

Grading systems: UBC grades are expressed as a percentage. College students are admitted on the basis of a four point scale. For a comparison of averages (see Table 10) grade points have been mapped to percentage points, but it is a rough conversion: inferences drawn from this table should not be given the same weight as others.

Last Session: the last session (if not a first or second session) attended by each student during the time-frame of the study regardless of graduation.

Session: grade and year level data for this report is based on enrolment in the UBC Winter session only, which begins in September and ends in April of the following year. The session is divided into two terms, but some courses may span both terms. The term "year" is also used interchangeably with "session."

Transfer credit: credit toward a degree program at UBC based on courses successfully completed at a college.

Unclassified students: Students who are registered at UBC, but have not been admitted to a degree program in a particular faculty.

- NURS Nursing
- PHAR Pharmaceutical Sciences
- REHB Rehabilitation Medicine
- SCIE Science
- SOWK Social Work

Programs of Study:

- BIOC Biochemistry
- BIOL Biology
- CIVL Civil Engineering
- CPSC Computer Science
- ENGL English
- FINC Finance
- FORM Forest Resources Management
- GEOG Geography
- HIST History
- HKIN Human Kinetics
- MECH Mechanical Engineering
- MICB Microbiology
- POLI Political Science
- PSYC Psychology

Degrees:

- BA Bachelor of Arts
- BASC Bachelor of Applied Science
- BCOM Bachelor of Commerce
- BEDE Bachelor of Education (elementary)
- BEDS Bachelor of Education (secondary)
- BFA Bachelor of Fine Arts
- BHE Bachelor of Home Economics
- BHK Bachelor of Human Kinetics
- BLA Bachelor of Landscape Architecture
- BMLS Bachelor of Medical Laboratory Science
- BMUS Bachelor of Music
- BSC Bachelor of Science
- BSCA Bachelor of Science, Agriculture
- BSCD Bachelor of Science, Dietetics
- BSCF Bachelor of Science, Forestry
- BSCN Bachelor of Science, Natural Resource Conservation
- BSCP Bachelor of Science, Pharmacy
- BSF Bachelor of Science, Forestry
- BSN Bachelor of Nursing
- BSOT Bachelor of Science, Occupational Therapy
- BSPT Bachelor of Science, Physiotherapy
- BSW Bachelor of Social Work
- DEDU Diploma in Education
- DFTN Diploma in French Translation
- LLB Bachelor of Law
